MINI-BARCOPER®

- Narrow machine to save space (open machine dimensions, without wrap: length 480 x width 200 + height 520mm)
- Wide range of tray sizes: from 375g to 1500g
- Easy plastic wrap positioning
- Self-regulation of temperature
- Easy sealing mechanism

Maxi-Micropack 2000

THE trendy and eco-friendly tray to boost your sales

Cartoper®

TRAYS MICROPACK 2000

Polypropylene trays specifically designed for lidding: wide edges for perfect sealing, reinforced material for improved resistance to weight and heat. Microwave safe (make a hole in the lid to let the steam out).

BARCOFILM UNIVERSAL PLASTIC WRAP

For polypropylene and cardboard trays

Transparent, peelable and highly resistant plastic wrap. Customizable from 12 rolls.

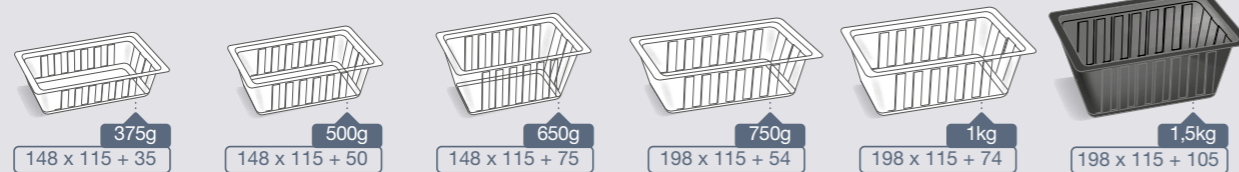

Mini-Barcoper® Barcofilm: 125mm x 300MI

Maxi-Barcoper® Barcofilm: 210mm x 300MI

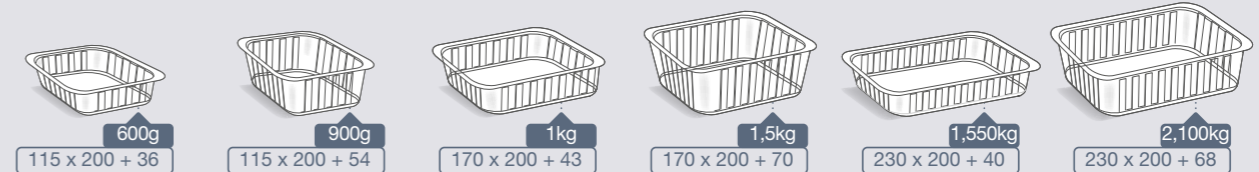

CARTOPER® TRAYS

Trays made of recyclable cardboard, with PET film inside. Can be used in ovens (180° max) and microwaves. Black in the inside to enhance preparations, kraft on the outside for a natural cardboard look.

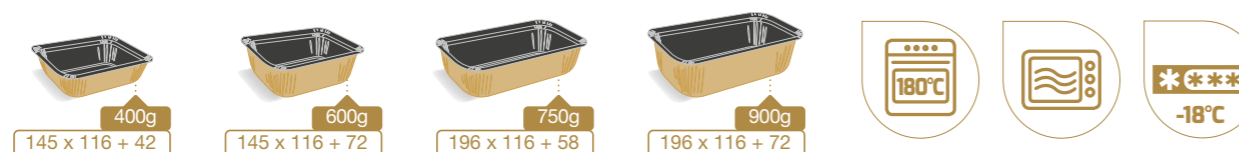

MICROPACK 2000 - 6 sizes, transparent or black - L x W + H mm

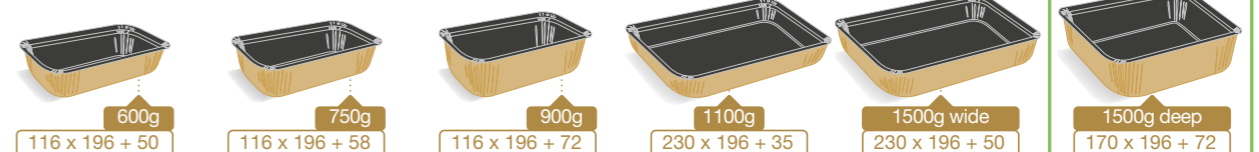

6 sizes, transparent - L x W + H mm - MAXI-MICROPACK 2000

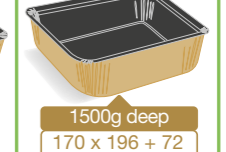

CARTOPER® - 4 sizes, black recyclable cardboard and brown kraft - L x W + H mm

SET UP & USE

Easy plastic wrap set up, identical for both machines.

Easy to use

- 1 Turn on the machine and let it heat.
- 2 Place the filled tray in the dedicated slot in front of the plastic wrap exit.
- 3 Pull the plastic wrap up to the fixing guide to fully cover the tray.
- 4 Press the handle until it stops.
- 5 Release when the indicator light goes out (about 2 seconds). The plastic wrap is cut automatically. The tray is sealed and ready!

2 YEAR WARRANTY
on parts and maintenance.
Afterwards, only the parts are charged.

Sealed tray
with peelable plastic
wrap

MAINTENANCE & CUSTOMER SERVICE

BARCOPER® machines are highly reliable and require little maintenance.

How to clean them:

- 1 Spray the N502 foam on the parts to clean and disinfect.
- 2 Let it rest for 4/5 minutes.
- 3 Dry with paper wipes.

CAUTION: Do not scrape or use abrasive pads on the welding head.

We take care of
customer service

It mainly concerns the replacement of 2 parts, due to wear:

- > The blade cutting the plastic wrap (every 2 years).
- > The resistance (every 5 years)

In case of breakdown, we lend you a machine while it's being repaired.
